LETTERS

487 Large Number of Ultraconserved Elements Were Already Present in the Jawed Vertebrate Ancestor
Jianli Wang, Alison P. Lee, Rimantas Kodzius, Sydney Brenner, and Byrappa Venkatesh

491 A Signature of Evolutionary Constraint on a Subset of Ecotopically Expressed Olfactory Receptor Genes
Omar De la Cruz, Ran Blekhman, Xiaohong Zhang, Dan Nicolae, Stuart Firestein, and Yoav Gilad

495 Zwilling-A and -B, Two Related Myelin Proteins of Telesios, Which Originate from a Single Bicistronic Transcript
Karin Schaefer and Christian Brösamle

RESEARCH ARTICLES

501 An Unbiased Estimator of Gene Diversity in Samples Containing Related Individuals
Michael DeGiorgio and Noah A. Rosenberg

513 Inferring the Strength of Selection in Drosophila under Complex Demographic Models
Josefa González, J. Michael Macpherson, Philipp W. Messer, and Dmitri A. Petrov

527 Inferring Selection on Amino Acid Preference in Protein Domains
Alan M. Torres and Richard Darlington

537 Mitochondrial Heteroplasmy and Paternal Leakage in Natural Populations of Silene vulgaris, a Gynodioecious Plant
Stephanie A. Patel, Mark E. Welch, and David E. McCauley

547 Molecular Evolution, Functional Variation, and Proposed Nomenclature of the Gene Family That Includes Sphingomyelinase D in Sicarid Spider Venoms
Genta J. Bledsoe, Melissa R. Bedros, Matthias H.J. Corides, Katherine L. Baldwin, Melody R. Rynerson, Scott N. Burns, and Pamela A. Zobel-Thropp

557 Selection on cis-Regulatory Variation at Hgα1 and Its Influence on von Willebrand Factor in Horseshoe Mice
Jill M. Johnson, Meike Teschke, Parvati Parvada, Beth M. McGee, Dorisdaud Taute, David Ginsburg, and John F. Baines

567 Near Neutrality, Rate Heterogeneity, and Linkage Govern Mitochondrial Genome Evolution in Atlantic Cod (Gadus morhua) and Other Gadine Fish
H. Dawn Marshall, Mark W. Coulson, and Steven M. Carr

579 Inferring Selection on cis-Regulatory Variation at Hgα1 and Its Influence on von Willebrand Factor in Horseshoe Mice
Jill M. Johnson, Meike Teschke, Parvati Parvada, Beth M. McGee, Dorisdaud Taute, David Ginsburg, and John F. Baines

603 Origin of Primate Orphan Genes: A Comparative Genomics Approach
Macarena Tall-Kimura, Nina Bouch, Nicole Belfora, Robert Castello, Liese Armengol, Xavier Estivill, and M. Mar-Alba

613 Adaptive Evolution of Fhox2D Genes in the Origin and Diversification of the Cetacean Flipper
Zhe Wang, Liyong Yuan, Stephen J. Roos, Stephen Z. Hu, Xueqin Zuo, Bangna Wu, Hui Zhong, Naizan Han, Garielle Jones, Paul D. Jefferson, and Shuyi Zhang

623 Explosive Speciation of Takifugu: Another Use of Fugu as a Model System for Evolutionary Biology
Yasuo Yamamuro, Masah Mita, Kiuchi Masunaga, Seiko Morizawa, Norihiro Tanimoto, Haruyuki Doi, Hiroshi Takahashi, Koji Mabuchi, Masami Nishida, and Masaru Sakai
